SUMMARY

Frontend-focused developer with hands-on experience building responsive, animated web interfaces and file-based systems software in C. Comfortable taking a project from a blank file to a working, deployable build. Currently sharpening full-stack fundamentals at the MANTRA 2026 Summer School.

EDUCATION

[Degree — e.g. B.Tech / B.E. in Computer Science] [Expected Graduation Year]

[College / University Name, City]

MANTRA 2026 Summer School — Frontend Web Development Program

TECHNICAL SKILLS

Languages: C, HTML5, CSS3, JavaScript (ES6)

Tools: Git, GitHub, VS Code, GitHub Pages

Concepts: Responsive Design, DOM Manipulation, Form Validation, File I/O, Struct-Based Data Modeling, Version Control

PROJECTS

Cassaano Hotel Website — HTML5, CSS3, JavaScript

- Built a responsive, multi-page luxury hotel website (home, about, rooms, gallery, contact) with a sticky nav, mobile menu, and image gallery.
- Implemented a JavaScript-validated room booking form, smooth scrolling, and scroll-triggered animations.
- Repo: github.com/Sharshavardhan-1573/HOTEL_WEBSITE

Hotel Management System — C, File Handling

- Developed a command-line hotel management system in C supporting add, search, display, and delete operations on guest records.
- Used struct-based data modeling with persistent file storage and automatic bill calculation based on length of stay.
- Repo: github.com/Sharshavardhan-1573/Hotel-management

Restaurant Management System (Menu Category Tree) — C, Tree Data Structures •

Group Project

- Built a restaurant menu management system in C using a First Child-Next Sibling tree to represent hierarchical categories (e.g. Food → Drinks → Juice).
- Implemented full CRUD (add, display, update, delete) plus recursive search over the category tree, with dynamic memory management via malloc/free.
- 2-person team with V. Karthikeya. Repo: github.com/karthikeya7428/Restaurant-Mangement1

Personal Portfolio Website — HTML5, CSS3, JavaScript

- Designed and built a fully responsive personal portfolio site with custom scroll animations, deployed via GitHub Pages.
